Fire blanket

The safe and easy way to extinguish small fires in liquids

A fire blanket efficiently extinguishes fires in liquids in e.g. deep friers, oil barrels, buckets, etc., but is also highly efficient in case of fire in people’s clothes.

The blanket is woven from 0.4 mm glass thread, and the flexible, strong and light blanket has a very high melting point. The hems are overlocked with fire-resistant Nomex-thread, and on the blanket are mounted two straps for pulling the blanket out of the cover.
Fire blanket

Prod. no.: .......................................................................................................................... AB 3003

Fabric type: .................................................................................................................. 440 EC 9 - 136
Length ............................................................................................................................... 1,800 mm
Width ............................................................................................................................... 1,000 mm
Thickness ........................................................................................................................ 0.4 mm

Weave .............................................................................................................................. 4 shaft satin

Strength
Tensile break force ........................................................................................................ 1,105 N/cm
Impact break force .......................................................................................................... 640 N/cm

Net weight ........................................................................................................................ 0.767 kg
Total weight ..................................................................................................................... 0.796 kg

Max operating temperature .............................................................................................. 550° C

About Lotek Safety
More than 25 years of experience make Lotek A/S one of the leading suppliers of products and solutions in the fields of fire protection, safety and rescue. Lotek A/S is a well-established company whose experience and quality product agencies are key components in ensuring our customers products and solutions of the optimum quality at the best price.

DBI certification number 232.398.
